

World Geography Summer Assignment

You are to view *How the States Got Their Shapes* on YouTube. If you type the documentary into the search line, look for the video that is 1:27:58. This is the full length video with no commercials. Take notes as you watch and be sure to detail the significant aspects of the video. Pay attention to what made the state borders the way they are today. Also, you should be able to answer the question, how did the states get their shapes, by the time the video is over. You should also include a one page reflection about your thoughts after you watched the video. Were you surprised by what you learned, did you know the real dividing line of the North and South? These are some questions that you may want to consider answering, but you are not limited to just these questions. Based on the notes you took, you will be ready for the quiz that will accompany this documentary when you return to school as well as a class discussion. Please be prepared, these will be the first grades when you return in August. Any questions please email at timclrk675@aol.com.
