NAZARETH ACADEMY HIGH SCHOOL

CHEMISTRY SUMMER ASSIGNMENT

Dear Incoming Chemistry Student:

Chemistry relies heavily on mathematical measurements and conversions, such as scientific notation, significant figures, and metric units. In order to prepare for the course, please complete these worksheets, which review concepts and skills you have learned in prior science classes at Nazareth Academy High School.

While you must complete the worksheets on your own, you may use any resource such as websites or books to help you. A great resource for help is Khan Academy. You may not collaborate with other students.

This assignment will count as your first grade of the semester, and is due on the first full day of classes, even if you are rostered for Chemistry in the spring semester. Ten points per day will be deducted for lateness. Make sure your name is on the packet.

We hope you enjoy a wonderful summer! We look forward to meeting with you next year!

Sincerely,

Ms. Carolyn Heston
